

Web Applications Developer

BackOffice Associates, LLC is a leading provider of business process oriented web applications. Our unique technology allows an open architecture platform for delivering web-based services that offer instant value opportunities to content driven processes.

Position Summary

In this position you will be responsible for prototyping and developing web-based applications, database configuration, and unit testing of CranSoft® Web Applications (WebApps). These applications are developed using a combination of proprietary CranSoft technology and industry standard technologies, and are used in conjunction with SAP and other business systems. You will also assist in system and integration testing, documentation, problem resolution, and customer support.

Responsibilities

- Design product features and functionality based on Business Requirements
- Prototype and Develop applications using CranSoft technology
- Perform Unit Testing of applications
- Research and resolve QA testing and Customer-reported issues
- All other duties, as assigned

Qualifications:

Required:

- Bachelor's degree in Computer Science, or related area, or equivalent experience
- 2+ years of software development experience
- 1+ years recent experience with SQL Query Writing and tuning
- Proven ability to work with a variety of technologies, both standard and proprietary

Preferred:

- 2+ years experience with MS SQL Server
- 2+ years experience with the technical side of SAP: database structure, SAP interfaces
- 2+ years experience with Oracle PL/SQL development
